

Beaumont – Alameda NET Roster and Critical Locations

Incident Team Leader (ITL	CON BRICCA [REDACTED]
<i>Backup Incident Team Leader</i>	KATHRYN STEWART [REDACTED]
Amateur Radio Operator (ARO)	JOHN STEUP, KG7JKN [REDACTED]
<i>Backup Amateur Radio Operator(s)</i>	KEITH SCHULENBURG, KE7SEK [REDACTED]
CPR/AED/FIRST AID Certified	Con Bricca Mary Copenhaver Laurel Freeborg Adam Karol Kamm Prongay John Steup Kathryn Stewart
NET Staging Area (NSA-1)	WILSHIRE PARK (field) N.E. 33 RD Ave/N.E. Skidmore St N.E. 37 th Ave/N.E. Shaver St
<i>Backup NET Staging Area (NSA-2)</i>	Beaumont Middle School (field) 4043 N.E. Fremont St.
<i>Backup NET Staging Area (NSA-3)</i>	Madeleine School (covered area in field) 3240 N.E. 23 rd Ave.
<i>Backup NET Staging Area (NSA-4)</i>	Alameda Elementary School (field) 2732 N.E. Freemont St.
Nearest FIRE STATION	FMA 14 - Captain Sullivan N.E. Killingsworth St. @ 19 th Ave. FMA 28 – N.E. Sandy Blvd. @ 56 th Ave.
Nearest BEECN	N.E. 13: Irvington Elementary School (field) 1320 N.E. Brazee St N.E. 14: All Saints School (Parking lot) N.E. Cesar Chavez Blvd & N.E. Glisan St N.E. 15: Rigler SUN Community School (field) N.E. Going St. and N.E. 55 th Ave.

Deployment and Operations **PLAN**

1. **Immediate Responsibilities Following a Disaster:**

- Members check themselves and persons in their household for injuries
- Members ensure their home/property are secure
- Member or person of the household should attempt to contact their emergency out-of-state (family) contact
- Member to don PPE and follow communications protocols, once above responsibilities are met and deployment is possible.

2. **Communications Protocols:**

- Members attempt to contact each other via GMRS radio (use **CHANNEL 4; alternate CHANNEL 2**)
- On the **RADIO**:
 - ✓ State your first name and cross street;
 - ✓ listen for team ARO or TL to confirm they read your transmission
 - ✓ Incident Team Leader (Bricca) will get on the air and initiate a general check-in, and then confirm the order to deploy to NET staging area, or ITL may ask members to stand by.

3. **Deployment Protocols:** *Remember that members may self-deploy only if:*

- A disaster is taking place
- Communications systems are down
- You have received no message from PBEM or ITL (Bricca)
- **En-route to NET staging area** (NSH-1, Wilshire Park), members use **"ICS Form -1 Damage Assessment"** to note/document damage in the neighborhood. *(This information gathered by team members as they make their way to staging area will later be used by the ITL to determine and delegate assignments for volunteers.)*
- **If members encounter Spontaneous Unaffiliated Volunteers (SUV's)** while proceeding to NSA-1, request that the volunteers accompany you so that NET member assigned to manage SUV's (**Fiedler**) can check them in/process/assign.

- **If NSA-1 is not safe/secure for NET operations** or if volunteers are unable to reach NSA-1, or if another site is preferable: RADIO other members if possible and proceed to NSH-2 Beaumont School field, NHS-3, Madeleine School, NHS-4, Alameda School, or designated safe site.

4. **On-Site Management Protocols:**

- The first member arriving at the NET Staging Area will serve as ITL until designated ITL (Bricca or Stewart) arrive on scene.
- Neighborhood damage assessment forms (**completed by members**) will be submitted to ITL.
- Establish radio communication (by **ARO on scene**), with the PBEM NET Coordinator to report team status and request/await instructions.
- ITL will work with the team to prioritize and delegate assignments as quickly as possible, once damage forms are reviewed. **Assignments will be delegated to functional teams that are no smaller than two (2) persons.**
- Functional teams will carry out their assignments using proper ICS documentation and staying in touch with the NET Staging AREA (NSA) via GMRS radio (CHANNEL 4).
- Once assignments are completed, members report back to NSA for further instructions.

5. **Spontaneous Unaffiliated Volunteers (SUV'S):**

- **Team SCRIBE** will check in volunteers using the **"PERSONNEL RESOURCES INTAKE FORM"**. Information provided will include: name of volunteer, whether volunteer has training/no training, volunteer contact information, special skills of the volunteer.
- Volunteers will be placed on "stand by": PRIOR to volunteers being assigned tasks, SUV's will be advised about **response safety and non-interference with emergency responders**. As the ITL develops NET assignments, appropriate tasks will be delegated to SUV's.

6. **Potential Neighborhood Vulnerability:**

- Our local schools have a dense concentration of people located in a small area. If a disaster occurs during school hours, the school yard may become our "staging area",

due to the possible designation of this locale as a **priority focus** region for initiating the NET process.

- A meeting with the school principal may benefit the NET team (and the school) in preparing for this potentially crucial need.
